## **SIDE LIGHTS:**

William McGurn has worked as a journalist in various ways, as an editor at the Wall Street Journal and a speechwriter for President George W. Bush at the White House. He has also written non-fiction books on topics such as the British handover of Hong Kong to China and the ethics of the free market economic system.

McGurn worked as a journalist in the Far East and Hong Kong for several years. In 1992 he published Perfidious Albion: The Abandonment of Hong Kong, 1997, which Robert Elegant of

the National Review called “a scathing indictment of the [British] Conservative government policy in Hong Kong. McGurn says in his book that the British government was far too lenient when it let the Chinese alone decide which institutions would run the former Crown Colony after it was taken over by the Chinese in 1997. McGurn believed that countries like the United States, which had a lot of money in Hong Kong, should have had more of a say in this stuff. Donald S. Zagoria, who writes for Foreign Affairs, called *Perfidious Albion* a “provocative study” and said “the picture of McGurn’s situation looks too bleak”.

Is the market fair? In *A Dialogue on Religion, Economics, and Justice*, McGurn and Rebecca M. Blank look at the market economy from two different perspectives. Blank looks at markets through the lens of faith, while McGurn’s lengthy chapter “Markets and Morals” delves into the moral aspects of markets. Darold Morgan wrote in *Christian Ethics Today*: “Both authors are committed Christians who want to see a big change in the way Christians think about capitalism in its most basic form: the market economy, which not only includes stocks and bonds, but also raw goods and services. From all over the world.” Morgan also said that the two authors “strongly agree that the virtues so hoped for in these markets depend on the people whose work and influence shape the economies of many countries across the world,” but McGurn “strongly supports personal integrity, which shows itself in honesty, courage, diligence, and a balanced lack of selfishness in these ongoing economic decisions. Blank, McGurn’s co-author, on the other hand, says that sometimes the government has to step in to fix the markets. Doug Bandow wrote in the *Cato Journal*: “Ultimately, both intellectual opponents agree on market value and the importance of virtue, but they disagree on how to prevent people from doing bad things. Gerald F. Vaughn gave *Is the Market Moral?* high marks in the *Journal of Economic Issues*. He said: “It is rare to find an economics book that is so well thought out and written that it can cover such a complicated subject in just 151 pages.”
