

The Cato Institute has produced a sobering analysis which highlights the consequences in Afghanistan after 10-years of United States military intervention.

"We have encouraged a centralized, nationalized government in what is essentially a pre-national society. And that does make room for the Taliban."

Cato: 10 Years in Afghanistan

The Cato Institute has produced a sobering analysis which highlights the consequences in Afghanistan after 10-years of United States military intervention.

"We have encouraged a centralized, nationalized government in what is essentially a pre-national society. And that does make room for the Taliban."

The War is ignorance

Submitted by [Willij4lib](#) on October 9, 2011 - 8:27am.

The start of the war was intended from the start to be a nation building effort and the results proof positive.

We have only worsened the corruption in Afghanistan from being there with our perverse ideas that don't even work here.

The results; HUGE DEBT which the financiers want, a corrupt USA style government willing to take on debt to pilfer the oil resources, more questions than answers on 9/11 and the enormous spread of cheap heroin in this country and the world. So from these results what was really intended and what are some of us sure our leadership is up to?

The intent is to in-debt the American people to the point of destroying A Republic in its entirety, wiping out the constitution of any meaning, to create a one world money supply, to create a one world Government, to distort peoples perception of who they actually are by constant lying to us. To take full control and manipulate life by pretending to control it as a dictatorship and to finally pilfer the planet until there nothing to live for.

The vision to Rule has been around since the time of Furrows and this idea has only grown in 5000 years and has achieved nothing of greatness nor will it ever. Our refusal to look here is truly our weakness unto ourselves, the intent of a few has interrupted the life of many because some decided themselves simply above what you say you are.

The war is false in every measure and many of our friends and neighbors gone never to return simply because they believe in serving the rest of us which is such a worthy cause. But those leading the cause deceivers in the highest form, the financiers, the globalist, the emperors' of the universe are all one in the same with the same intent as those 5000 years ago and we have yet to graduate on how to inform ourselves by reviewing actual results and understanding intent and cause.

All Life is the cause of something in some degree whether by action or lack of in agreement to something they know nothing of. We the people is in reference to we are life and we inform ourselves about ourselves, but we have brought on the assumption some other knows far more than we do by the concepts they put before us that show no real value.

Sheep are lead and individuals are cause and informed cause is stellar and ignorant cause is very much todays world if we view the world from a results perspective. How dare we admit the truths to the very cause we say we are.

The Republic is us as a public among all other public to be heard and to be acknowledged for the lessons we have learned. To pass these along with the understanding of such results, to grow and achieve greatness by how well we each produce for each other great experiences we would only allow ourselves in such a Republic by the care and respect we have for ourselves. War is not civil or respect or of genuine basis and is the act against life itself. To destroy ourselves is a menace and ignorance in the highest forms yet so many refuse to look in the reflection of their very own mirror and answer the very simple questions like; Why am I here, what purpose do I serve, why does life grow, which life do I wish to live by direction and what is that direction?

Here are some answers if you really go verify for yourself you will be able to see them the same way that I can by the honesty you share with yourself.

I am here to deliver ideas, concepts and assistance to all other life forms to bring up our level to survive in a direction in life. My purpose is to share me with others in a constructive manner that serves us all, that promotes life's ability to grow. My direction chosen is a Republic life for public life to be allowed to display itself in public, to gain from, to determine from and ultimately to decide from the wisdom of my experiences and the experiences of others who put them on display to question and evaluate for use to better assist all others like me in the form of life with care and respect into self. Yes this goes much farther than others are willing to go but truly came about by the discoveries of me in the first place and was to think of others as no less than myself which in truth is full on respect to me and all life around me. We have the ability to question ourselves and our motives and we are very powerful by choice whether in ignorance or informed will make no such difference. What we decide on is exactly what shall be and that my fellow life is the simple truth. You can look at you or you can ignore you all by the act of simple choice.

I **BOLDY** have gone where so few have even touched on in an effort to discover myself and be me by really looking at the reflection of myself or all the results I can bare in a life time which in actuality is the full on truth to be discovered.

I guess it is up to me isn't it, as well up to you and this would say aloud it is not up to some other to miss guide you.

DELIVER or GO HOME!
