Health care plan is a lump of coal for America

2:42 PM CST, December 21, 2009

On Christmas Eve, the Democrats plan to pass Obamacare even though 61% of the US opposes it. The Congressional Budget Office estimates that the average middle class American family will pay what amounts to a \$15,200 annual federally mandated fee for Obamacare. The CATO Institute estimates that after one sees through the "Democratic budget gimmicks", Obamacare will cost over \$6.25 trillion. The Democrats plan to give American families more than just a little lump of coal in their stockings for Christmas. They plan to dump a whole car load of coal on them.
