## Report from Cato for misery- Soros' propaganda

Jan. 26, 2015

Cato Institute ranked Macedonia on 12th place on the misery in the world and the media financed by Soros, expressly carried out the news for report.

The opposition SDSM, reacted to the report from the Institute, while no one said which it is the Institute and who is funding it, writes "Republika".

The Institute has clear ties with Soros. Indirectly and directly. For the sake of truth, it was formed in 1974 by brothers David and Charlie Koch. The brothers are just as controversial as the billionaire Soros.

-It is not any research institute but classical think tank lobby organization often accused by the US media to lobby for private business interests. The magazine Forbes in story titled "The Kochs Are not the Only Funders of Cato" writes that Koch brothers fund this Institute with tens of millions of dollars, reported Republika.

On the list of financiers and the network they publish it is clearly stated that one of the financiers is George Soros. Among other things, he visited the debates organized by the Institute and at the Institute's web site is described as a philanthropist, humanitarian, and donor. This is one of a series of institutes, which are used by Soros propaganda.
