

Downsizing government, the Cato way

 Posted by [Clyde Middleton](#) on Mar 7 2011 Filed under [Economy](#), [News & Opinion](#), [Politics](#). You can follow any responses to this entry through the [RSS 2.0](#). You can leave a response or trackback to this entry

The [Cato Institute](#) has a website worth reviewing and pushing onto your elected reps. It's called [Downsizing Government dot org](#). Cato goes through each federal department and proposes what appear to be responsible and appropriate cuts (a few departments are still being prepped for release.

They've take a shot at [the Republicans](#) in this YouTube, but if you follow what [Reid](#) is saying in WDC then you realize that the [Democrats](#) are even further out of step.

Spend some time [on Cato's site](#), and then write your reps. Maybe these fools will listen before we go the way of Greece, [Ireland](#), and Spain.
