

AOC has a surprise for you on her road to the presidency

S. Noble

April 17, 2019

Alexandria Ocasio-Cortez has big plans for her future and all of ours. Her mother said she wants to be President one day. Michael Moore would like her to run now and would have liked the Constitution changed to allow it.

The commie girl is starting out on the road to the presidency with her Green New Deal (GND) which would fundamentally transform our economy to a socialist economy and destroy it. The GND will also change our society. There is nothing Mao-Cortez doesn't want to control.

Yesterday, she warned she had a surprise for us that she has been working on for months.

Her handlers have her PR machine up and running.

In a series of Twitter posts Wednesday, Ocasio-Cortez shared her new approach to selling the GND, still declaring that we only have "12 years left to cut emissions in half." That's her outrageous deadline.

"A Green New Deal is our plan for a world and a future worth fighting for," she says in the film.

The 7-minute, self-narrated video below, titled, "A Message From the Future With Alexandria Ocasio-Cortez," is spoken from years into the future. AOC allegedly wrote and narrated the piece.

"We only had 12 years to change EVERYTHING... how we got around, how we fed ourselves, how we made our stuff, how we lived and worked... everything!" she says in the film. Then she adds, "The only way to do it was to transform our economy, which we already knew was broken, since the vast majority of wealth was going to just a small handful of people, and most folks were falling further and further behind."

We know the "economy was broken?" She is a nitwit!

It tells the bizarre story of how Democrats and the Green New Deal saved the planet from the disastrous Climate Change Armageddon.

The video is full of disinformation. She makes false claims about rising temperatures and ignores the fact that temperatures are now declining. Global warming is doing nothing.

The Green New Deal/Medicare for All/universal income plan she is promoting does not make note of how they are going to pay for it. Beto said we are going to have to sacrifice. We welcome all Democrats to do that. Leave us out of it.

This is a false propaganda play. It's very slick and she narrates it well, but that's how she won her election in part — with a slick video created by her radical socialist group, Justice Democrats.

Dr. Patrick Michaels of The Cato Institute destroys the alarmism arguments. In short, the world isn't coming to an end. Compare his background to AOC's. He explains the data used is skewed and flawed. It's very interesting and informative.
