## 2009 Koch Doc. Koch Lobbyist to Play Bigger Roll in Monitoring Government & list where Lobbyist went

By [fredericacade](#)

An ALEC Movement, In a 2009 Koch Press Release It Speaks of a New Project where Koch Lobbyist Would Play Bigger Roll in Monitoring Governmental Affairs and Legislature in Majority of the States, Included the Names of Who is Involved in Your State

Koch Industries promotes the message of ALEC and it permeates through all its companies. Koch brothers in this mindset if possible would have ownership in everything they touch. It is reflective in their current fight to gain the majority stocks in Libertarian Think Tank the Cato Institute. In 2009 out of 50 states Koch sent lobbyist into 42 states to promote their likely political agenda. The Koch brothers interest in politics is open and it is passed down to its employees, which can be seen in their campaign donations. Some of the states not mention in the Press Release are Alaska. There is a chance that some of the states not listed like Alaska already promote the Koch agenda at the time of the Press Release. It would certainly no sense doubling efforts in Alaska when your agenda is already working in that particular state. Koch like most of the oil and gas companies can call Alaska home.
