## **Kulongoski gets an F**

The Cato Institute released a biennial fiscal report card of governors as reported in The Wall Street Journal. The governors are graded on their taxing and spending records.

Governors who have cut taxes and spending the most receive the highest grades, while those who increased taxes and spending the most receive the lowest grades. Seven governors received an F, and Ted Kulongoski is among them.

Oregonians deserve and need an "A" governor to address Oregon's fiscal mess and make the needed tax and spending reforms. Business taxes need to be reduced to attract investment and grow Oregon's economy. — Dick Dunbar, Medford
