## *We need to be free; ViewPoint*

December 27, 2011 Tuesday

**SECTION:** LETTERS; Pg. 14,15

MAY I please beg all the Conservative readers of the Grimsby Telegraph to write to David Cameron and their own politicians begging him to: Please say "no" to all the thousands of new regulations that are going to come our way in the near future. Diktats that serve no useful purpose.

France makes over half these diktats, but sees fit not to implement them in France. They do not get fined for this - why? Is it because when Angela Merkel says "jump" the French President says, "How high"? Obedience begats favours.

Over 90 per cent of the British population want us to leave Europe completely. The House of Commons, and the House of Lords are now changing their minds about the EU.

Those that say that we could not survive alone only have to look at Iceland to see how to do it and the benefits of being on the "outside" of this evil cadre.

We could trade with any country we pleased, without being bound hand and foot by bureaucratic red tape.

This country needs to be free to make its own laws, we should be free to implement the laws we have had for centuries without having to go cap-in-hand to a foreign junta for "permission" to extradite people who are harmful to the wellbeing of the indigenous people of our nation.

We would benefit enormously from the import/export market once our EU handcuffs were removed. The EU needs our trade more than we need theirs. Why are we messing about? Only because those idiots in parliament have allowed it to happen, by signing documents without reading them, and then allowing the same documents to be "altered" by pen-pushers in Brussels without saying a word in protest. Merkel's "mob" are now busy making rules and dictates that will give them dominance and control over all of Great Britain's fiscal matters knowing that "He who controls the purse strings controls the country".

You only have to look at Ireland to see the results of fiscal integration. Then compare it with Iceland's economy to see the big picture.

Germany's sovereign balance sheet shows that Germany has a debt GDP ratio of 84 per cent. But Axel Weber (head of the German Bank) says that the real debt is over 200 per cent. No wonder they want to control all our monetary matters!

Two years ago (2009) Jagadeesh Gokhale of **Cato Institute** published a paper for EuroStat, claiming Germany's unfunded liabilities were nearly 418 per cent.

And we all know what has happen to everyone's economy since then, don't we? We will be saving £54-million a day if we are ruling ourselves, won't we? Now that can't be bad for a start, can it?

Jack Kinsman, Stainton Drive, Grimsby.
