(Todd Zywicki) This is a cool new website on the history and philosophy of libertarianism. Especially recommended is David Boaz's essay on the history of libertarianism, which I like because of its implicit Harold Berman themes (Berman's book *Law and Revolution* has been a huge intellectual influence on me). Also not to be missed, of course, is the profile of our very own co-conspirator Randy Barnett as a "Major Libertarian Figure." I think the website looks really great too.
