

Lady Gaga and the Speed of the Information Age

by [Wayne Crews](#) on December 15, 2011 · [Add a Comment](#)

This amazing video gives a few incredible statistics:

- 70% of Facebook users live outside the U.S.
- 550,000 Android devices get activated daily
- Twitter registers 300,000 new users daily — Lady Gaga is by far the most popular human being

And my favorite:

- 35 hours of video are uploaded to YouTube every minute; that's 2100 days of video added for every day in real time
