

Expansionism is Good

Since it wasn't too muggy outside, we also swung by **1000 Mass Ave. NW**, where work has also begun on another **Akridge-managed** building, the expanding **Cato Institute HQ**. First step is **demolishing** the smaller National Medical Association Building next door. (Hope it's wearing a DNR bracelet or confusion may arise.) When finished, the 76K SF addition will **double the office space** available and bump up the building by a story. **Gensler** is the architect; **Clark Construction** is the contractor. And champion of limited government Cato will continue as owner.
