The Truth About Energy/Climate: Sponsored by the Dayton Tea Party

January 18, 2010

The Dayton Tea Party with the Ohio Liberty Council cordially invites the public to hear the truth about climate change and meeting America's energy needs at the Ohio Energy and Climate Conference, Saturday, February 6, at Miami University's Middletown campus, from 1:00 to 5:00 p.m. Guests from the Heritage Foundation, the Cato Institute, and the Institute for Energy Research will discuss current and future policy, the science of climate change and energy sources, and practical applications of energy sources with a focus on nuclear energy.

America's best and brightest energy experts are included in the speaker lineup:

- Ben Lieberman, Senior Policy Analyst at the Heritage Foundation
- Patrick Michaels, Senior Fellow in Environmental Studies at the Cato Institute
- Mary Hutzler, Senior Fellow at the Institute for Energy Research
- William Tucker, author of Terrestrial Energy

Consider these facts:

- Climate change is a natural occurrence. The slight increase in temperature observed since 1900 is entirely consistent with well-established, long-term natural climate cycles.
- The biggest climate change ever experienced on the earth took place about 700 million years ago.
- After World War II, there was a huge surge in recorded carbon dioxide emissions, but global temperatures fell for four decades after 1940.
- There is no scientific or statistical evidence that global warming will cause more storms or other weather extremes.
- Man-made carbon dioxide emissions throughout human history constitute less than 0.00022 percent of the total naturally emitted from the earth's mantle during geologic history.

The Ohio Energy and Climate Conference is sponsored by the Ohio Liberty Council's Cincinnati Tea Party, Cincinnati 9/12 Project, and Dayton Tea Party.

Location

Dave Finkelman Auditorium
4200 North University Blvd.
Middletown, OH 45042
Local: (513) 727-3200
Toll free: (800) 662-2262

Tickets

Only 750 tickets will be sold. Tickets are \$12 and can be purchased at <http://americanjunto.org/>. The full ticket price is tax deductible (American Junto is a 501(c)(3) organization).

About the Heritage Foundation – The Heritage Foundation is the nation's most broadly supported public policy research institute. Founded in February 1973, its mission is to formulate and promote conservative public policies based on the principles of free enterprise, limited government, individual freedom, traditional American values, and a strong national defense. The Heritage Foundation is a unique think tank that draws solutions to contemporary problems from the ideas, principles and traditions that make America great. <http://www.heritage.org/>

About the Cato Institute – Edward H. Crane founded the Cato Institute in 1977. It is a nonprofit public policy research foundation headquartered in Washington, D.C. It is named for Cato's Letters, a series of libertarian pamphlets that helped to lay the philosophical foundation for the American Revolution. The institute's mission is to increase the understanding of public policies based on the principles of limited government, free markets, individual liberty, and peace. The Institute will use the most effective means to originate, advocate, promote, and disseminate applicable policy proposals that create free, open, and civil societies in the United States and throughout the world. <http://www.cato.org/>

About the Institute for Energy Research – The IER is a not-for-profit organization that conducts intensive research and analysis on the functions, operations, and government regulation of global energy markets. IER maintains that freely functioning energy markets provide the most efficient and effective solutions to today's global energy and environmental challenges. The institute was founded in 1989. Its tenets are free markets, objective science, public policy tradeoffs, efficient outcomes, and impartial and unbiased government policies. <http://www.instituteforenergyresearch.org/>

i'm curious why there aren't any scientists in this panel of so-called experts. (or if there are scientists, they are paid by corporate-sponsored think-tanks)

2. john b on January 18th, 2010 10:17 pm

i mean the mission statement of IER basically states that any research will be biased from the get-go. if you want people to take you seriously, you should allow for dissenting voices.

3. Steve on January 19th, 2010 9:30 am

You might want to replace the word truth with something more fitting like, “Our ignorant view”

Got something to say?
