Gov. Jack Markell gets a 'D' Grade

November 3rd, 2012

Believe it or not, Gov. Jerry Brown of California scores better than Gov. Jack Markell of Delaware, according to the **CATO Institute's** Fiscal Policy Report Card on America's Governors 2012. The report "grades government on their fiscal policies for a limited government perspective."

Jerry Brown (CA) 49 D

Jack Markell (DE) 48 D

We lost over 10,000 high paying union jobs with the closing down of GM and Chrysler plants, and now we are dealing with a "green" car manufacturer that is making us see "red!" I do expect Gov. Markell to get re-elected in spite of his poor fiscal grade.
